

Bian Agro Nusantara

Bian Agro founded in 2022 with focus on expanding the Indonesian market towards the global market. Bian Agro supports business people in Indonesia, especially in small and medium scale agricultural businesses to be able to compete globally as a solution to penetrate a global market.

We partner not only with business actors but also with government stakeholders who also support the expansion of the export market for local Indonesian products

About Bian Agro

Our Vision

Become The Center of Development
Indonesian Product Towards Global Market

Our Mission

- Curation and clasification of potential product
- Synergy with related partners and parties in streghthening the global market
- Continuous Product Development

Our Value

We partner with farmers to produce good quality dried taro leaves as a substitute for herbs, spices and tobacco. Our products are well processed through methods that always pay attention to every detail.

Dried Chopped Taro Leaves

Dried Chopped Taro Leaves made from Taro Beneng which can be used as a substitute for tobacco or can be used as herbs or spices

Taro Tuber

The tuber is also good for digestion, vision, skin health, cognitive function, immune system function, preventing heart disease, anti-cancer and losing weight

SEE OUR PROJECT

Taro Leaves

This plant is widely cultivated or grows wild in East Java, Indonesia. This plant can also grow well in various places even with different conditions. In addition to the many benefits of this plant, it is also an alternative to herbs and tobacco.
